Explanation report

Data handling

Data format: We work with PDJ, JPG, Word, excel, Powerpoint, TIFF, EPS, AI and Indd files. If you send open data files please also send pictures and fonts.

Resolution: 300dpi or more for 1:1 presentation

Paper size: Maximum 450 x 320 mm (SRA3). For borderless printing your data files need to have a bleed trim (**see picture**).

Farbraum: CYMK (Coated FOGRA39 - PDF/X-1a:2001)
The RGB colour range can only be simulated.

Fee for printing device

Important: For printing there is a **one-off set up** printing fee, which starts at 1 Euro. A minimum service fee of 5 Euro will be taken for any data corrections such as:

- Adding bleed
- Adjusting size
- Correcting colour space
- Creating montage etc.

If anything is unclear to you, please talk to us **before** we begin printing.

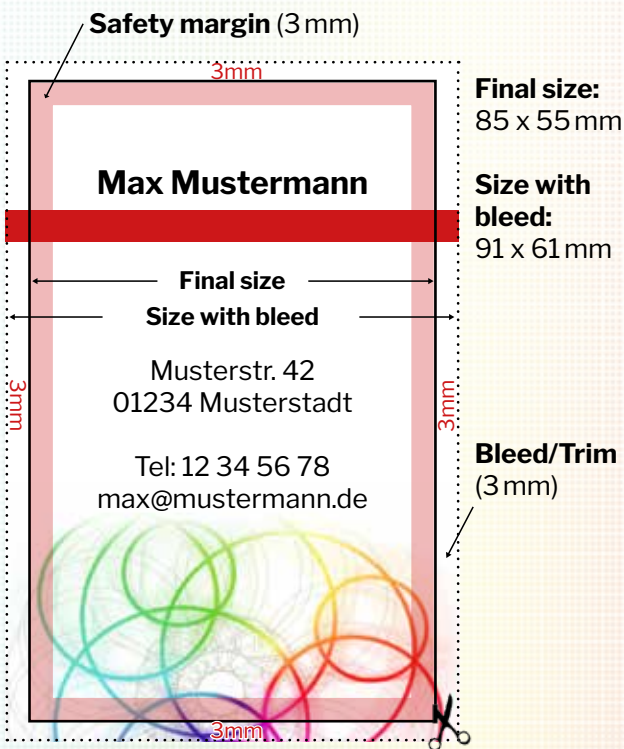

Format table

Format	Size
Business card	85 x 55 mm
DIN long	99-105 x 210 mm
A7	105 x 74 mm
A6	148 x 105 mm
A5	210 x 148 mm
A4	297 x 210 mm
A3	420 x 297 mm
A2	594 x 420 mm
B2	700 x 500 mm
A1	841 x 594 mm
B1	1000 x 700 mm
A0	1189 x 841 mm

Bleed / Trim

After printing the outer 3mm will be cut off, so please consider this when placing items, pictures, background colours and ensure that they reach beyond the format edge and include a minimum 3mm into the bleed. Please avoid narrow borders and don't place text close to the document edge as this could be cut away (see safety margin as shown in picture).

Example of bleed with a business card:

Printing

A wide range of printing options are available for all brochures including end processing such as cutting, binding, stapling, and folding. Please talk to a staff member about options and prices.

Transfer foil A4	7,00 €	Only light-coloured textiles
Transfer foil A3	11,00 €	Only light-coloured textiles
Flex (one colour)	starting with 12,00 €	light and dark coloured textiles
SolventFlex	starting with 12,00 €	light and dark coloured textiles

Please ask which printing technique is best for you. A fee may be charged for data processing.

Examples of textile printing

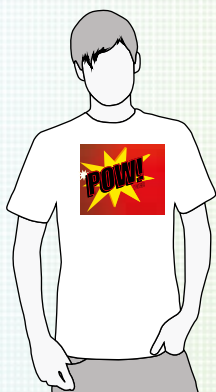

SolventFlex

With SolventFlex you can achieve great results for small and large print runs. Due to the precise cutting even complex logos are possible on light or dark coloured textiles

Flex foil

This is a low-cost way for printing your motifs on textiles. This technique is well suited for single-coloured logos or text etc. The foil is long-lasting and will not fade. The data file must be provided as a vector graphic.

Transferfolie

This foil is made for easy and low-cost printing on your textiles, but only works on light-coloured textile - white is best. After washing the motif may be slightly damaged so this foil is recommended for one-off events like promotions, bachelor parties etc.

Stamps

We offer high quality stamping machines (Colour Printer-series), wooden stamps and stamp accessories.

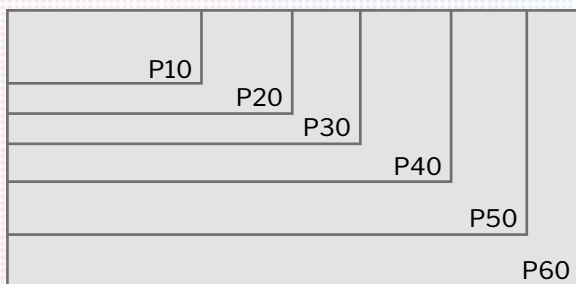

It will take about 1-3 days to produce it.

A fee may be charged for data processing.

Large format

Large format data handling

Data format: We need PDF-, JPG- or TIFF-files.

Resolution: For a 1:1 presentation in DIN A0 format we recommend 300dpi. For larger formats 150dpi is enough

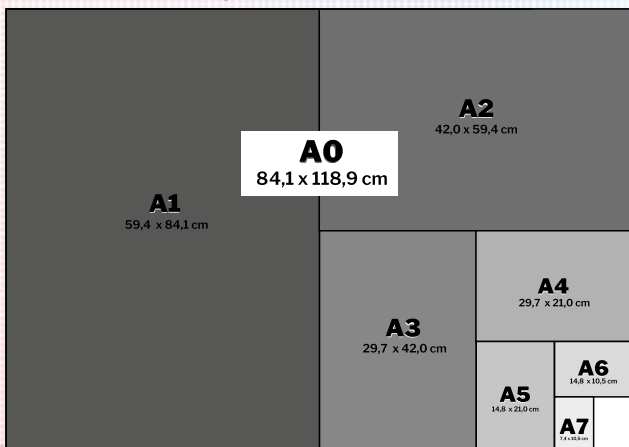

Colour space: CYMK, FOGRA39 (RGB can only be simulated)

For complex printing projects please schedule an appointment so we can do a data check and/or a press proof.

Time frame for any further processing

The UV-stable EcoSolvent ink needs a drying time of 2 to 24 hours, depending on colours, material and the kind of further processing. For your project management please remember that further processing for banners and canvas can take up to 4 working days.

We only use high quality materials and manufacturers (Oracal, Emblem, Signolit etc.).

Signs

Aluminium boards (3mm)

The aluminium board is perfect for outdoor use e.g. as a storefront sign. The boards are laminated and covered easily and good so it is a good material for signs.

Kapa Mount boards (10mm)

Kapa boards are good for mounting pictures, posters and plans. Due to their light weight they are easy to transport and easy to install.

Forex boards (3mm and 5mm)

This light hard foam board has good inherent rigidity and is weather resistant. This makes it perfect for outdoor use such as a storefront sign, but it is also popular for indoor events.

Size/Thickness: These sizes are in stock with the following prices (different sizes on demand):

A3	A2	B2	A1	B1	A0

Acryl / Plexiglas®: This is very popular for office signs. We need additional information for producing it including format, size, which foil technique should be used, whether you need drill holes, etc. Please talk to us so we can understand your requirements.

Sticker

We can produce any kind of sticker you want whether it is round, square or jagged. Due to the precise printing and cutting abilities of our machines a wide range of sizes and formats are possible.

Prices will be calculated according to the quantity you need

A3	A2	B2	A1	B1	A0
18 €	24 €	31 €	39 €	50 €	60 €

A fee for producing or correcting the data file may be charged. The cut stickers will be delivered to you on DIN A4 sheets. The production time is up to 2 working days.

Cutting plot

We can produce text, graphics wall tattoos etc. as a cutting plot for you. We use only high-quality foils (Oracal: 631, 651, 751, 8500, 8510).

You receive an excavated product on transfer paper.

Your motif shouldn't be too detailed. Please talk to us in advance to see if your motif can be produced using this technique and to see the possible colour options. A vector graphic is mandatory!

The price depends on motif design, quantity, foil etc.

As a guideline: 50 Euro/square meter.

Price list for Digital and Offset printing

Following some prices for basic products.

With digital printing it will only take a couple of hours (up to 1 day). Offset printing will take about. 3-5 days but is for higher volumes much cheaper. Please remind that for your project. Offset prices **can't be paid** with the Credit subscription.

Notice: Please see the printing details for set up on page 4.
